

WEST BENGAL NURSING COUNCIL

SECOND YEAR GENERAL NURSING-MIDWIFERY (3 Yrs.) EXAMINATION, AUGUST - 2019

SUBJECT: CHILD HEALTH NURSING (PAPER IV)
(OBJECTIVE)

Full Marks: 20

Time Allowed: 20 mnts.

ANSWER ON THIS SHEET ONLY

5. Write full form of the following :-

1x5=5

- a) POCSO (Act) Protection of children from sexual offenses (Act)
- b) WIFSP Weekly Iron Fifer Supplementation Program
- c) ICDS Integrated child Development scheme
- d) STORCH Syphilis, treponemiasis, rubella, cytomegalovirus, herpes simplex
- e) PDA Patent Ductus Arteriosus

6. Match the items of Column 'A' with Column 'B'

1x5=5

Column A

- a) Enuresis
- b) Diphtheria
- c) Malnutrition
- d) Rickets
- e) Adolesents girl

Column B

- I) Anorexia nervosa (e)
- II) Vitamin D deficiency (d)
- III) Elimination Problem (a)
- IV) Sore throat (b)
- V) Post measles complication (c)
- VI) Vitamin C deficiency

7. Fill up the blanks :

1x5=5

- a) The appropriate age for repair of cleft palate is 6m 1/2 yrs.
- b) The drawing of chest wall is a sign of Severe pneumonia
- c) Lateral or side to side curvature of spine is known as Scoliosis
- d) The process of physiological and functional maturation of a child is termed as Growth
- e) Down syndrome is a Chromosomal disorder.

8. Write 'True' for correct and 'False' for incorrect statement :-

1x5=5

- a) Iron deficiency Anaemia is not a problem among Pre-School Children. (F)
- b) CSF becomes turbid in bacterial meningitis. (T)
- c) Tricuspid atresia causes cyanotic heart disease. (T)
- d) Diarrhoea is common complication of a child with burn. (F)
- e) Mid-day school meal provide one-third of daily calorie requirement of a child. (T)

WEST BENGAL NURSING COUNCIL

THIRD YEAR GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, AUGUST - 2018

SUBJECT : PAEDIATRIC NURSING (Paper II) (OBJECTIVE)

Full Marks: 20

Time Allowed: 20 mnts.

ANSWER ON THIS SHEET ONLY

5. Fill in the blanks :-

1x5=5

- a) The estimation of surface area in Paediatric burn is commonly calculated by _____.
- b) Vit-A oil is to be started at the age of _____.
- c) The collection of pus in pleural cavity is called _____.
- d) Physiological jaundice usually develops on _____ day after birth.
- e) Causitive organism of oral thrush is _____.

6. Write 'T' (True) against the correct statement and 'F' (False) against the Incorrect statement :-

1x5=5

- a) Suctioning of the nose should be done first during neonatal resuscitation. ()
- b) The child with moderate level of mental retardation is trainable. ()
- c) BCG immunization is given through Intradermal route. ()
- d) Exclusive Breast feeding is given up to six months. ()
- e) TOF is an example of Anorectal malformation. ()

7. Write full form of :-

1x5=5

- a) IMNCI : _____
- b) SNCU : _____
- c) PEM : _____
- d) BFHI : _____
- e) STORCH : _____

8. Match the items of Column 'A' with the items of Column 'B'

1x5=5

Column A

- a) Birth Injury
- b) Rickets
- c) Hook worm
- d) Meningitis
- e) Nail biting

Column B

- i) Anaemia
- ii) Kernig's sign
- iii) Erb's Palsy
- iv) Anxiety
- v) Congenital deformity
- vi) Vit-D deficiency

WEST BENGAL NURSING COUNCIL

SECOND YEAR GENERAL NURSING-MIDWIFERY (3 Yrs.) EXAMINATION, AUGUST - 2018
SUBJECT: CHILD HEALTH NURSING (PAPER IV)
(OBJECTIVE)

Full Marks: 20

Time Allowed: 20 mnts.

ANSWER ON THIS SHEET ONLY

6. Match the items of Column 'A' with Column 'B'

1x10=10

Column A

- a) Worm Infestation
- b) Intussusception
- c) Anterior Fontanelle
- d) Neonate
- e) Pyloric Stenosis
- f) Thalassemia
- g) Anasarca
- h) Hydrocephalus
- i) Thrush
- j) Measles vaccine

Column B

- i) Candidiasis
- ii) Projectile vomiting
- iii) 9 months of age
- iv) Albendazole
- v) 18 months of age
- vi) 24 months of age
- vii) Anemia
- viii) Birth to one month of age
- ix) Intestinal obstruction
- x) V.P Shunt
- xi) Nephrotic Syndrome

7. Write True/False against the following statements:-

1x5=5

- a) Talipes Equinoverus is the most common type of club foot. ()
- b) Spina bifida is one of the commonest anomaly of Neural Tube. ()
- c) Breastfeeding week is 1st week of November. ()
- d) Ricket is due to the deficiency of Vit C. ()
- e) At the age of one year, the infant's birth weight will be tripled. ()

8. Fill up the blanks :

1x5=5

- a) The herniation of abdominal organ through a wide open umbilicus is known as _____.
- b) Fast breathing due to ARI for a child of 2 to 12 months is more than _____/minute.
- c) Anwesha clinic is arranged for _____ group.
- d) Emotional development theory was explained by _____.
- e) Hirschsprung's disease is also known as _____.

WEST BENGAL NURSING
SECOND YEAR GENERAL NURSING-MIDWIFERY (3 Years) EXAMINATION,

FEBRUARY - 2018

SUBJECT: CHILD HEALTH NURSING (Paper - IV)

(OBJECTIVE)

Full Marks: 20

ANSWER ON THIS SHEET ONLY

Time Allowed: 20 mnts.

5. Fill up the blanks :

1x5=5

- Mode of entry of typhoid bacillus via oral route in human being.
- The causative organism of chicken pox is Varicella - zoster.
- Inflammation of middle ear is called Otitis media.
- TEF is an abnormal connection between trachea & esophagus.
- Inherited bleeding disorder due to deficiency of plasma coagulation factors is known as _____.

6. Write 'True' / 'False' against the following statement :-

1x5=5

- Genetic counselling before marriage is a way of preventing Thalassaemia. (T)
- Measles vaccine is given at the age of 6 months. (F)
- The child labour act (Prohibition & Regulation) Act was implemented in 1986. (T)
- In talipes valgus, heel and foot are turned inwards. (F)
- The child with moderate level of mental retardation is trainable. (T)

7. Write full form of the following abbreviations :

1x5=5

- BCG Bacillus of Calmette and Guerin
- VSD Ventricular Septal Defect
- UNICEF United Nations International children's Emergency Fund
- BFHI Baby friendly Hospital Initiative
- RNTCP Revised National Tuberculosis Control Programme

8. Match the Column 'A' with 'B'

15=5

Column A

- Kerning's sign. (1)
- Adolescent girl (IV)
- Colostomy (I)
- Myopia (V)
- Toddler (h)

Column B

- Anorectal Malformation
- 1 - 3 years
- Meningitis
- Anorexia nervosa
- Near sightedness

WEST BENGAL NURSING COUNCIL
SECOND YEAR GENERAL NURSING MIDWIFERY EXAMINATION, AUGUST- 2017.
SUBJECT - CHILD HEALTH NURSING, Paper IV (OBJECTIVE)

Full Marks - 20

Time allowed - 20 mins.

ANSWER ON THE SHEET ONLY

5. Fill in the blanks with suitable words:

- a. Surgical reconstruction of cleft lip is called Cheiloplasty 1X5=5
- b. A habit disorder of eating non-edible substance like clay, chalk, paints etc is called Pica / Beschagi.
- c. Causative organism of whooping cough is Bordetella pertussis.
- d. Anaemia due to deficiency of vitamin B12 is known as _____ anaemia.
- e. Mode of transmission of leprosy is through _____ transmission.

6. Write 'T' (True) against the correct and 'F' (False) against the incorrect statement. 1X5=5

- a. Talipes is an example of Anorectal malformation. (F)
- b. Congenital megacolon is due to absence of ganglionic cell in the colon. (T)
- c. Temper Tantrums is a common childhood behavioural problem. (T)
- d. Complementary feeding for infant should be started after the age of 6 months. ()
- e. ASD is one of the commonest anomaly of neural tube. (F)

7. Match the items of column A with the items of column B 1X5=5

Column A

- a. Convulsion (1)
- b. Breast Feeding Week (V)
- c. Haemophilia (1)
- d. Keratomalacia (V)
- e. Enuresis (1)

Column B

- i. Bed wetting
- ii. Factor VIII deficiency
- iii. Epilepsy
- iv. 1st Week of August
- v. 1st week of November
- vi. Vit A deficiency

8. Encircle (O) the most suitable answer: 1X5=5

I) The child with moderate level of Mental Retardation is-

- a) Educable. b) Untrainable. c) Trainable.

II) The best restraint for a child with cleft lip repair is:-

- a) Jacket restraint b) Finger restraint c) Elbow restraint

III) Circumcision is done in case of:-

- a) Hypospadias b) Epispadias c) Phimosis

IV) Anterior fontanelle closes at the age of-

- a) 12 months b) 17 months c) 18 months

- congenital heart disease -

WEST BENGAL NURSING COUNCIL

THIRD YEAR GENERAL NURSING MIDWIFERY (3½ YEARS) EXAMINATION, AUGUST - 2017

SUBJECT: Paediatric Nursing (Paper - II) (Objective)

TIME ALLOWED: 20 mins

FULL MARKS: 20

Answer on the sheet only.

5. Fill in the gaps with suitable word:

1 X 5 = 5

a) The herniation of abdominal organ through a wide open umbilicus is known as _____

b) Thumb sucking occurs due to feeling of _____ in childhood.

c) Infants weight increases 3 times of birth weight at the age of _____.

d) _____ is one of the common ~~cyanotic~~ heart disease.

e) Neonatal Jaundice is treated by _____.

6. True / False

1 X 5 = 5

a) Adequate love and affection helps child to be mentally stable. (T)

b) Temporary teething completed at the age of 12-15 month. (F)

c) Bowel, Bladder control is achieved at the age of 2 yrs. (F)

d) Generalised tonic clonic seizure also known Grandmal type of seizure.. (T)

e) C.S.F. becomes turbid in bacterial meningitis. (T)

7. Match Column 'A' with that of Column 'B'

1 X 10 = 10

Column A

a) Toddler (ii)

b)V.S.D (iii)

c)Asphyxia (v)

d) Nephroblastoma (v)

e) Piperazine (iv)

f) Kangaroo care (vii)

g) Colostomy (i)

h) Undescended testis (vi)

i) Otitis media (x)

Column B

i) Intestinal obstruction

ii) 1-3 years

iii) Acyanotic heart disease

iv) Deworming

v)Wilms' Tumour

vi) Oxygen

vii) Low birth weight baby.

viii) Orchidopexy

ix) Near sightedness

x) Middle ear infection

**ANSWER ON THIS SHEET ONLY**

1. Match the following items in column A with that of column B

1x10=10

Column A

- a. Breast feeding week
- b. Phimosis
- c. Neonates
- d. Kwashiorkar
- e. Keratomalacia
- f. Scabies
- g. Kerning's sign
- h. Hemophilia
- i. Adolescence girl
- j. Piperazine

Column B

- i. Protein deficiency (d) (e)
- ii. Vit. A deficiency (b)
- iii. Circumcision (3) (f)
- iv. Benzyl Benzoate. (a) (i)
- v. 1st week of August. (j) (i)
- vi. Anorexia Nervosa (j) (l)
- vii. Meningitis (l)
- viii. Birth to 4 wks of life (c)
- ix. Deworming (j)
- x. Absence of clotting factor. (h)

2. Fill in the blanks:-

1x5=5

- a. Physiological jaundice develops on 2-3 day after birth.
- b. Causative organism of oral thrush is Candida Albicans
- c. During first four months of life, average weight gain per day of an infant is 25-35 gm
- d. Head circumference and chest circumference become equal at the age of 5-12 months
- e. Mode of entry of typhoid bacillus via fecal route / urine route route in human being.

3. Write the full form of the followings:-

1x5=5

- a. ICDS Integrated Child Development Services
- b. FBNC Facility Based Newborn Care
- c. STORCH Syphilis, Toxoplasmosis, Other Infection, Rubella, Cytomegalovirus infection, and Herpes Simplex
- d. PDA Patent ductus arteriosus
- e. SNCU Sick Newborn Care Unit

WEST BENGAL NURSING COUNCIL

THIRD GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JANUARY-2015

SUBJECT : PAEDIATRIC NURSING (Paper-II) (OBJECTIVE)

Full Marks: 25

Time Allowed: 25 mnts.

ANSWER ON THIS SHEET ONLY

5. Fill in the blanks :-

1x5=5

a) During first four months of life an average weight gain per day of an infant is _____

15-30 gm

b) Neonatal jaundice is treated by _____

phototherapy

c) Head circumference and chest circumference of a baby becomes same at the age of _____

6 - 12 months

d) The causative organism of oral thrush is _____

Candida albicans

e) Surgical reconstruction of cleft lip is called _____

chirurgist

6. Match the Column 'A' with that of the Column 'B'

1x10=10

Column A

- a) Kangaroo care
- b) V.S.D
- c) Hold heads steady
- d) Asphyxia
- e) Hemophilia
- f) Pyloric stenosis
- g) Hydrocephalus
- h) Erb's Palsy
- i) Piperazine
- j) Enuresis

Column B

- i) O₂ (d)
- ii) Projectile vomiting (f)
- iii) Birth injury (h)
- iv) Low Birth weight (a)
- v) Bulging fontanelle (g)
- vi) Bed wetting (j)
- vii) Acyanotic heart Disease (b)
- viii) Deworming (i)
- ix) 3 months (c)
- x) Factor VIII deficiency (e)

7. Write 'T' (true) against the correct statement and 'F' (false) against the incorrect statement

1x5=5

- a) The child with moderate level of mental retardation is trainable (T)
- b) The best restraint for a child with cleft lip repair is Jacket Restraint (F)
- c) Genetic counselling before marriage is a way of preventing Thalassaemia (T)
- d) A child admitted with severe diarrhoea, the first measures should be taken administration of ORS (T)
- e) Talipes equinovarus is the most common type of club foot ()

(2)

8. Write the full form of the following abbreviations :-

1x5=5

- a) BCG _____
- b) VSD _____
- c) TOF _____
- d) ORT oral rehydrat. therapy
- e) PEM _____

MoneyGita

WEST BENGAL NURSING COUNCIL

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JANUARY-2014

SUBJECT : PAEDIATRIC NURSING (Paper-II) (OBJECTIVE)

Time Allowed: 20 mnts.

15 March, 20

ANSWER ON THIS SHEET ONLY

Q. Give a (✓) to the most suitable answer :- 1x5=5

a) The characteristics of physiological jaundice are :-

i) Maximum intensity of jaundice is found on the 4th day in term babies with a serum bilirubin which does not exceed 15 mg./dl.

ii) Usually mothers does not need any encouragement for exclusive breast feeding.

iii) It may be aggravated by prematurity and infection only.

b) A child may be dumb because of :-

Deafness. Deafness.

i) Blindness.

ii) Tongue tie.

c) The predisposing situations in accidental injury in children are :-

i) Hyperactive, curious children only have chances of accident.

ii) Accident may happen only in the homes.

Accidents are more common in aggressive, stubborn, poor concentration and un-supervised children

d) Rooting reflex disappears at the age of :-

i) 1 - 2 months.

ii) 2 - 3 months.

iii) 6 - 7 months.

e) Osmotic diarrhea is due to :-

i) Small Bowel defect and malabsorption.

ii) Malabsorption and poorly absorbed solute ingestion.

iii) Ingestion of poorly absorbed solute or malabsorption or a small bowel defect.

6. Write 'T' against 'True' and 'F' against 'False' statement :-

1x5=5

i) The ingredients of oral rehydration salts are sodium chloride (3.5 gms) and potassium chloride (1.5 gms) only. (F)

ii) TOF is an Anorectal malformations. (F)

iii) Exclusive Breast feeding is feeding the baby only mother's breast milk upto Six months. (T)

iv) WHO proposed the cut off point of Hb. Level for different age group for diagnosis of anemia is 11 gms/dl for 6 months (infants) to 6 yrs. of children. (T)

v) Immunization of a child is not compulsory (F)

P.T.O.

7. Fill in the blanks :-

- a) Polycystic kidney is one of the common congenital anomalies as autosomal disease.
- b) Failure of one or both testis to reach the normal position in the scrotum is called undescended testes. Undescended testes.
- c) Palatoplasty is the surgical reconstruction of palate cleft palate.
- d) According to the child labour act no child shall be permitted to not below 14 yrs.
- e) The estimation of surface area in paediatric burns is commonly calculated by Rule of Nine.

8. Match the Column 'A' with that of Column 'B'

Column A

- i) Kangaroo care (i)
- ii) Encephalitis (ii)
- iii) Guillain Barre Syndrome (iv)
- iv) Spina Bifida (v)
- v) Otitis Externa (iii)
- vi) Cerebellar ataxia (i)
- vii) Low birth weight baby (ii)
- viii) Impacted Cepumen (v)
- ix) Demyelination (iii)
- x) Neural tube anomaly (iv)
- xi) Swimmer's ear

Column B

inherited
inherited

Rule of Nine

Cleft lip surgery - cheiloplasty

Tracheoesophageal
fistula

Tracheoesophageal Fistula

THIRD YEAR GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, AUG. - 2014

SUBJECT : PAEDIATRIC NURSING (Paper II)
(OBJECTIVE)

Full Marks: 15

Time Allowed: 15 mnts

Pediatric

ANSWER ON THIS SHEET ONLY

5. Encircle the most suitable answer :-

1x5=5

- A baby can hold his head at the age of :
 a. 15 days
 b. 5 months
 c. 3 months ✓
- The common infection of the oral cavity and tongue is by :
 a. Fungus
 b. Bacteria
 c. Virus
- Nursing Care for the infant with a surgical Lip repair includes -
 a. Keeping the suture clean and dry.
 b. Keep the baby calm and quiet to avoid crying.
 c. Both a & b.
- The first symptom of sickness in an infant is usually manifested by -
 a. Pallor
 b. Failure to take feeds well
 c. Fever
- Which one of the following is a cyanotic congenital heart disease -
 a. TOF (tetralogy of fallot) (Tetralogy of fallot)
 b. VSD (Ventricular septal defect)
 c. PDA (Patent ductus arteriosus)

6. Fill in the blanks :-

- Causative organism of whooping cough is *Haemophilus influenzae* 1x5=5
- Bowel and bladder control is achieved at the age of Age 3 yrs.
- Maintenance of warm chain prevent Hypothermia during neonatal period. Hypothermia
- Physiological jaundice develops within 72 hours after birth.
- Common cause of anaemia in children is Iron iron deficiency.

P.T.O.

7. Match the Column 'A' with the Column 'B'

Column A

- a) Colostomy (v)
- b) Beriberi (iii)
- c) Pneumonia (v)
- d) Kwashiorkor (ii)
- e) Erb's Palsy (i)

Column B

- i) Brain injury (e)
- ii) Protein deficiency (d)
- iii) Vit B₁₂ deficiency (b)
- iv) Anorectal Malformation (a)
- v) Fast breathing (c)
- vi) Congenital anomaly

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JULY-2013

SUBJECT : PAEDIATRIC NURSING (Paper-II) (OBJECTIVE)

Page No. 20

Time Allowed: 20 mnts.

ANSWER ON THIS SHEET ONLY.

5. Write full form of the following abbreviations.

- B.C.G.: Bacillus Calmette Guérin 1x5=5
 A.R.M.: Anorectal Malformation
 V.S.D.: Ventricular Septal Defect
 T.E.F.: Tracheo-esophageal Fistula
 O.R.S.: Oral Rehydration Solution
6. Write 'T' against true statement & 'F' against false statement 1x5=5

- a) Sex education is essential for all adolescents. (T)
 b) 1-3 years child is called toddler. (T)
 c) Mode of transmission of Leprosy is mainly by oral route. (F)
 d) Turn the neonates head slowly to right or left side is called moro reflex. (F)
 e) Serial manipulation followed by immobilization by plaster cast is management of club foot. (T)

7. Tick mark (✓) the most suitable answer: 1x4=4

- a) Anaemia is due to deficiency of Vitamin B12 is known as -
 i) Aplastic anaemia ii) Megaloblastic iii) Hemolytic
- b) Depression of Anterior Fontanels is a sign of -
 i) Dehydration ii) Cough & cold iii) Fever
- c) The child with moderate level of mental retardation is -
 i) Educable ii) Trainable iii) Untrainable
- d) The best restraint for a child with cleft lip repair is -
 i) Jacket restraint ii) Finger restraint iii) Elbow restraint

8. Match the Column 'A' with Column 'B': 1x6=6

Column A

- a) Asphyxia (v)
 b) Kernig's sign (vi)
 c) Neonatal Jaundice (vii)
 d) Breast feeding week (i)
 e) Undescended Testes (ii)
 f) Colostomy (iii)

Column B

- i) 1st week of August (d)
 ii) Orchidopexy (e)
 iii) Anorectal Malformation (f)
 iv) Oxygen (a)
 v) 1st week of November
 vi) Meningitis (b)
 vii) Phototherapy (c)

iv) 12 years

WEST BENGAL NURSING

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JUNE - 2012

SUBJECT : PAEDIATRIC NURSING (OBJECTIVE)

Full Marks: 25

Time Allowed: 25 mnts.

ANSWER ON THIS SHEET ONLY

5. Fill the blanks with appropriate word :-

1x5=5

- Infants weight is three times of birth weight at one year.
- Extra oral fluid is given to the child in fever to prevent dehydration.
- The child with acute respiratory infections to be kept in prone bed rest position.
- Thumb sucking occurs due to feeling of insanity and tension, a disease restless.
- One of the causes of helminthic infestation among children in rural area is hookworm infestation.

6. Encircle the most suitable answer :-

1x6=6

- Respiratory rate of a one month old baby with acute respiratory infection will be -
 - More than 40 per minute
 - More than 50 per minute
 - More than 60 per minute
- Circumcision or excision of foreskin of the glans penis is done in case of -
 - Hypospadias
 - Epispadias
 - Phimosis
- A child with nephrotic syndrome should have diet with -
 - Low protein high salt and adequate fluid.
 - High protein, high salt and restricted fluid.
 - High protein with salt and fluid restricted diet.
- A child may be dumb because of -
 - Deafness
 - Tongue tie
 - Cleft palate
- The child with moderate level of mental retardation is -
 - Educable
 - Uneducable
 - Untrainable

(2) Severe diarrhea with dehydration should be managed with -

- i) Oral rehydration salt solution
- ii) Intravenous dextrose solution and antibiotic
- iii) Intravenous Ringer lactated solution and Q.R.S.

7. Write 'T' (true) against the correct statement & 'F' (false) against the incorrect statement: 1x6=6

- a) Anthropometric assessment includes measurement of the head circumference of the child with meningitis. ()
- b) Child should be placed in propped up position after lumbar puncture. ()
- c) Bicarbonate is used to correct metabolic acidosis. ()
- d) Congenital mega colon is due to absence of ganglionic cells in the colon. (F)
- e) Atrial septal defect is a congenital cyanotic heart disease. (F)
- f) Ketogenic diet is given with high fat and low carbohydrate and low protein. (T)

8. Match the statements given in Column 'A' with the term in Column 'B' 1x8=8

Column A

- 1) Soft musical noise breathing out
- 2) Kernig's Sign
- 3) Enuresis
- 4) Otitis media
- 5) Thrush
- 6) Koplik's spot
- 7) Neonatal Jaundice
- 8) Hemophillia

Column B

- a) Bed wetting (3)
- b) Infection of the middle ear. (4)
- c) Candidiasis (5)
- d) Meningitis (2)
- e) Absence of clotting factor (8)
- f) Wheezing (1)
- g) Wilm's tumor
- h) Measles (6)
- i) Phototherapy (7)

WEST BENGAL NURSING COUNCIL

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, DECEMBER 2010
 SUBJECT : PAEDIATRIC NURSING (Paper II)
 (OBJECTIVE)

Full Marks: 25

Time Allowed: 25 mnts.

ANSWER ON THIS SHEET ONLY

4. Fill in the blanks :-

$1 \times 5 = 5$

- i) Exclusive Breast feeding should be given to the child upto 6 months of age.
- ii) At the age of 9 months, a child is fed Vit A oil along with measles vaccination.
- iii) Neonatal Jaundice is treated by phototherapy.
- iv) Initial assessment of a newborn baby is done by a scoring is called Apgar Scoring.
- v) Fast breathing and chest indrawings are the features of Acute Pneumonia.

5. Write 'True' in True and 'False' in False statement.

$1 \times 5 = 5$

- i) Anterior fontanelle closes at the age of 6 months. 18 months
- ii) Sex education is essential for all adolescents.
- iii) A child doubles his birth weight at the age of 1 year. (5 months)
- iv) Growth and development depends both on Heredity and Environment.
- v) When a baby suffers from Diarrhoea, breast milk should be stopped.

6. Place a tick () mark in the most appropriate answer :-

$1 \times 5 = 5$

i) The first manifestation of sickness of an infant is

a) Vomiting

b) Diarrhoea

c) Refusal of food

ii) Number of milk teeth is

a) 10

b) 20

c) 24.

iii) Ring worm is caused by

a) Virus

b) Bacteria

c) Fungus

iv) Pigeon chest occurs in

a) Marasmus

b) Rickets

c) Beriberi

P.T.O.

(2)

5. Match Column A with that of Column B

Column A	Column B
a) Colostomy (ii)	i) Neural tube defect
b) Meningocele (i)	ii) Hyper bilirubine mia
c) Haemophilia (iv)	iii) Ano-rectal malformations
d) Kangaroo Care (v)	iv) Factor VIII deficiency
e) Photo therapy (1)	v) Low birth weight
	vi) Vit D deficiency

6. Fill in the blanks with suitable words : 1x5=5

- a) The process of functional and physiological maturation of an individual is termed

as growth development ✓

- b) Head circumference and chest circumference of a baby becomes same at the

age of 6-12 month ✓

- c) Genital growth accelerates during adolescence period

- d) Temper tantrum is a behavioural problem, usually seen in a child
during toddler period

- e) Down syndrome is a chromosomal disorder disease.

7. Write 'T' if the statement is True and write 'F' If the statement is False. 1x5=5

- a) Complementary feeding for infant should be started after the age of 6 months. T

- ~~b)~~ B. C. G. Vaccination is administrated in intramuscular route. Intradermal F

- c) Recurrent respiratory infections and otitis media are found in a child with cleft palate and cleft lip. (F)

- d) Serial manipulation followed by immobilization by plaster cast is done in the management of club foot. T

- e) IMNCI (Integrated management of Neonatal and childhood illness) Programme includes the case management of the children upto 12 years of age. (F)

For all children upto 5 years.

Length ~~double~~ double - 4-4.5 years

(2)

v) Legal age of marriage of a girl child is

- a) 16 years
- b) 18 years
- c) 20 years

1x5=5

7. Write full forms of the following abbreviations :-

- i) BCG Bacillus Calmette Guérin
- ii) VSD Ventricular Septal Defect
- iii) DPT Diphtheria Pertussis Tetanus
- iv) RCH Reproductive Child Health
- v) ICDS Integrated Child Development Scheme

8. Match the Column 'A' with the Column 'B'

1x5=5

Column A

Column B

- | | |
|----------------------|----------------------------------|
| a) Kwashiorkar (iii) | i) Factor VIII deficiency |
| b) Hemophilia (i) | ii) Vertical transmission |
| c) Phymosis (v) | iii) Protein energy malnutrition |
| d) Scabies (iv) | iv) Benzyl Benzoate |
| e) HIV/AIDS (ii) | v) Circumcision |
| | vi) Cotrimoxazole |

WEST BENGAL NURSING COUNCIL

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JUNE -2010
SUBJECT: PAEDIATRIC NURSING (OBJECTIVE)

ROLL NO.....

Full Marks: 20

Time Allowed: 20 mnts.

Answer on this sheet only

4. Encircle the most suitable answer :

1x5=5

a) The changing focus of Paediatric Nursing is on :

- i) Disease centred care
- ii) Providing routine care
- iii) Caring for the first five years of life.
- iv) Child centred care within the family system.

b) Components of essential neonatal care includes all except :

- i) Warm resuscitation.
- ii) Conducting delivery in a warm room.
- iii) Bathing preponed.
- iv) Warm transportation.

c) Iodine deficiency disorders include :

- i) Goitre
- ii) Retarded growth and impaired mental function.
- iii) Increase rate of spontaneous abortion and still birth.
- iv) All of the above.

d) Which of the following is a cyanotic congenital heart disease.

- i) VSD - Ventricular Septal Defect
- ii) TOF - Tetralogy of Fallot.
- iii) ASD - Atrial Septal Defect
- iv) PDA - Patent ductus arteriosus

e) The Juvenile Justice Act (2000) is applicable for those children who has not attained the age of :

- i) 14 years
- ii) 16 years
- iii) 18 years
- iv) 12 years

PTO

5. Match Column A with that of Column B

<u>Column A</u>	<u>Column B</u>
a) Colostomy	i) Neural tube defect
b) Meningocele	ii) Hyper bilirubine mia
c) Haemophilla	iii) Ano-recral malformations
d) Kangaroo Care	iv) Factor VIII deficiency
e) Photo therapy	v) Low birth weight
	vi) Vit D deficiency

6. Fill in the blanks with suitable words :

1x5=5

- a). The process of functional and physiological maturation of an individual is termed

as growth & development

- b) Head circumference and chest circumference of a baby becomes same at the

age of 1 year

- c) Genital growth accelerates during adolescent period.

- d) Temper tantrum is a behavioural problem, usually seen in a child

during Toddler period

- e) Down syndrome is a genetic disorder disease.

7. Write 'T' If the statement is True and write 'F' If the statement is False.

1x5=5

- a) Complementary feeding for infant should be started after the age of 6 months. (T)
- b) B.C.G. Vaccination is administrated in Intramuscular route. (T)
- c) Recurrent respiratory infections and otitis media are found in a child with cleft palate and cleft lip. (T)
- d) Serial manipulation followed by immobilization by plaster cast is done in the management of club foot. (T)
- e) IMNCI (Integrated management of Neonatal and childhood illness) Programme includes the case management of the children upto 12 years of age. (F)

TAMIL NADU TENGAL NURSING COUNCIL
FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, DECEMBER -2009
SUBJECT : PAEDIATRIC NURSING (OBJECTIVE)

Full Marks: 25

Time Allowed: 25 mnts.

ANSWER ON THIS SHEET ONLY

4. Fill in the blanks :-

1x5=5

- a) Chest indrawing and fast breathing are features of severe Pneumonia.
- b) Most fatal complication of a child with a Rheumatic fever is Carditis.
- c) Birth weight is usually tripled by the age of 1 yr.
- d) Cleft palate must be repaired before Speech development.
- e) Bowel and bladder control is achieved at the age of 2 yrs.

5. Match the Column 'A' with that of the Column 'B'

1x10=10

Column A

Column B

- | | |
|-------------------------------|--|
| a) Hirschprung disease (vii) | i) Meningitis |
| b) Fungal infection (viii) | ii) Deworming |
| c) Ophthalmic neonatarum (iv) | iii) Endocarditis |
| d) Pyloric stenosis (x) | iv) STD |
| e) Sore throat (ii) | v) Mumps |
| f) Piperazine (ii) | vi) A gray false membrane over upper respiratory tract |
| g) Diphtheria (v) | vii) Aganglionic colon |
| h) Orchitis (v) | viii) candidiasis |
| i) Kernig's sign (i) | ix) Absence of clotting factors |
| j) Haemophilia (x) | x) Non bile stained vomitus |

6. Write 'T' against True statement and 'F' against False statement.

1x5=5

- a) Thyromegaly is also known as Goitre (T)
- b) Bicarbonate is used in Metabolic alkalosis (F)
- c) CSF becomes turbid in bacterial meningitis (T)
- d) Ventriculo-peritoneal shunt is done in case of cardiomegaly (F)
- e) Mumps is the inflammation of the parathyroid gland (F)

P.T.O.

(2)

1x5=5

7. Choose and tick () mark the right answer :-

- a) Carbral Malaria is caused by
- (i) P. Vivax
 - (ii) P. falciparum
 - (iii) P. Ovale
- b) PEP should be give to a baby of HIV Infected mother within (2hrs / 10 days / 1 week)
- c) Anemia is due to deficiency of Vit B₁₂ Is known as
- (i) aplastic anemia
 - (ii) megaloblastic anemia
 - (iii) Haemolytic anemia
- d) Orchidopexy is done in case of (Phimosis / Orchitis / undescended testes)
- e) Physiological jaundice in appeared in new born within (2-3 days / 4-5 days / 7 days)

WEST BENGAL NURSING COUNCIL

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JUNE -2009

SUBJECT: PAEDIATRIC NURSING (OBJECTIVE)

Full Marks: 20

Answer on this sheet only

5. Write 'T' against 'True' statement and 'F' against 'False' statement 1x5=5

- a) Ancylostomiasis is the infection caused by Hook Worm (T)
- b) A baby born from a hepatitis B carrier mother does not require hepatitis B vaccination. (F)
- c) Genetic counselling before marriage is a way of preventing Thalassaemia. (T)
- d) Chest Indrawing is a sign of ARI. (T)
- e) Non-bilious projectile vomiting in an infant is usually due to Pyloric Stenosis. ()

6. Fill in the blanks with suitable words : 1x5=5

- a) Thumb sucking occurs due to feeling of _____ in childhood.
- b) Causative organism of oral thrush is _____
- c) The method of evaluation of the status of newborn baby just after birth is known as Apgar score.
- d) When the prepuce cannot be retracted over the glans penis due to tightness is termed as phimosis.
- e) Night blindness is caused due to deficiency of _____

7. Match Column A with that of Column B 1x10=10

Column A

- a) Haemophilia
- b) Cleft Palate
- c) Asphyxia
- d) Otitis media
- e) Nail Biting
- f) Fallot's tetralogy
- g) B.C.G.
- h) Convulsion
- i) Spina bifida
- j) Mongolism

Column B

- I) Eustachian tube (d)
- II) Anxiety (e)
- III) Koch's Infection (b)
- IV) Heredity (a)
- V) Feeding problem (b)
- VI) Oxygen (c)
- VII) Down's Syndrome (j)
- VIII) Congenital deformity (i)
- IX) Congenital Heart Disease (f)
- X) Hyper pyrexia (l)
- XI) Epilepsy. (h)

WEST BENGAL NURSING COUNCIL

FINAL GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, DECEMBER -2008

SUBJECT: PAEDIATRIC NURSING (OBJECTIVE)

Full Marks: 20

Time Allowed: 20 mnts.

Answer on this sheet only

5. Encircle (O) the most suitable answer : 1x5=5

- a) According to WHO, adolescence period extends from –
 i) 10 years to 18 years
 ii) 12 years to 18 years
 iii) 13 years to 19 years

- b) The Child Marriage Restraint Act, 1978 fixed the legal minimum age of marriage as follows –

- i) 18 years for both girls and boys.
 ✓ 18 years for girls and 21 years for boys.
 ii) 21 years for both girls and boys.

- c) Severe diarrhoeal dehydration should be managed with –
 i) Oral rehydration salt (ORS) solution and metronidazole.
 ii) Intravenous dextrose solution and antibiotics.
 iii) Intravenous Ringer lactate solution and ORS solution.

- d) Acute Rheumatic fever is diagnosed in the presence of following features –

- i) Carditis, Chorea and arthralgia.
 ii) Fever, Chest Pain and tachycardia.
 iii) Fever, arthralgia and Chest Pain

- e) Mastoidectomy is indicated in a case of –

- i) Breast Cancer
 ii) Oral Cancer
 iii) Chronic Suppurative Otitis media

6. Write 'T' against 'True' statement and 'F' against 'False' statement 1x5=5

- a) Exclusive Breast feeding to be given to the infant upto the age of six month (T)
 b) Talipes equinovarus is the most common type of club-foot (F)
 c) Hypospadias is the congenital abnormality of the urethral opening on the dorsal aspect of Penis (F)
 d) Thalassemia is an inherited bleeding disorder due to the deficiency to plasma coagulation factor (F)
 e) Commonly used scabicidal agent is benzyl benzoate (F)

(2)

7. Fill up the blanks :

1x5=5

- a) A child doubles the birth length by _____ years of age
- b) Milk teething is completed by the age of _____
- c) Malignant embryonal tumour of the kidney found in the children is known as _____
- d) The xerosis is the condition due to deficiency of _____
- e) Orchidopexy is the surgical management done in the condition termed as _____

8. Match Column A with that of Column B

1x5=5

Column A

- a) Myopia
b) Ventricular septal defects
c) Toddler
d) Hyperopia
e) Hold heads steady

Column B

- i) 1-2 years
ii) Near sightedness
iii) Ventricular peritoneal shunt
iv) Far sightedness
v) 3 months
vi) A cyanotic heart disease

WEST BENGAL NURSING COUNCIL

Final General Nursing-Midwifery (New) Examination, August-2007
 Subject : Paediatric Nursing (Objective)

Answer on this sheet only

Full Marks : 20

Time Allowed : 20 Mins

$$1 \times 5 = 5$$

4. Encircle the most suitable answer

- a) Which assessment finding is normal for a 3 months old baby ?
 - i) Able to lift head and shoulder.
 - ii) Able to roll from back to abdomen.
 - iii) Able to hold bottle.
- b) Which is the most prominent finding for an infant with hydrocephalus ?
 - i) Marked depression of the Anterior Fontanelle.
 - ii) Absence of the sucking reflex.
 - iii) Increase in size of head.
- c) Which restraint is best for a child who has had a cleft lip repaired ?
 - i) Jacket Restraint.
 - ii) Elbow Restraint.
 - iii) Finger Restraint.
- d) Which of the following diet is most appropriate for a child after Tonsillectomy.
 - i) Orange Juice.
 - ii) Ice Cream.
 - iii) Luke Warm Milk.
- e) While caring for mouth of a leukemic child who is on cancer Chemotherapy, the nurse should avoid using of
 - i) Straws.
 - ii) A toothbrush.
 - iii) Mouth Wash.

5. Fill in the blanks.

$$1 \times 5 = 5$$

- i) Anterior Fontanelle closes at the age of _____
- ii) Pathological Jaundice appears within _____ of birth.
- iii) Koplick's Spot is a sign of _____
- iv) The Umbilical Vein carries _____ blood.
- v) Inflammation or Infection of the Middle Ear is called _____

Cont/d..... 2

6. Write 'T' against the true statement and 'F' against the false statement.

$1 \times 5 = 5$

- a) Thumb Sucking indicates a natural behavior in a 3 years old child ()
- b) Cephal Hematoma is not occurring due to birth injuries. ()
- c) Palpation of abdomen should be avoided in Wilm's Tumor. ()
- d) Oral Thrush is a Bacterial Infection. ()
- e) There is no Substitute of Breast Feeding ()

7. Match the column 'A' with that of column 'B'

$1 \times 5 = 5$

Column 'A'

- a) Erb's Palsy
- b) Pyloric stenosis
- c) Haemophilia
- d) Keratomalacia
- e) Esophageal Atresia

Column 'B'

- 1) Vitamin D
- 2) Heredity
- 3) Feeding Problem.
- 4) Projectile Vomiting
- 5) Birth Injuries.
- 6) Vitamin 'A'
