ROLL No. _____

WEST BENGAL NURSING COUNCIL**First Year General Nursing & Midwifery (3 Years) Examination****November 2024****Subject – Foundation of Nursing (Paper: III)****OBJECTIVE****Full Marks – 20****Allowed Time – 20 minutes***Answer on Sheet only.***1. Fill in the blanks:****1×5=5**

- (a) Method of separation of an infected person is called _____.
- (b) Lack of oxygen in the tissue is called _____.
- (c) Presence of blood in stool is known as _____.
- (d) Nurses day is celebrated on _____.
- (e) Inflammation of gum is called _____.

2. Write 'True' or 'False' against the following statements:**1×5=5**

- (a) Offensive breath is termed as cheilosis. ()
- (b) Emergency admission admits acute patient. ()
- (c) Condy's Lotion is prepared by KMnO_4 . ()
- (d) Thermogenesis means physical regulation of heat production. ()
- (e) Tearing of ligaments is known as Sprain. ()

3. Match the Column 'A' with Column 'B':**1×10=10**Column 'A'

- (i) SOS
- (ii) Sitz bath
- (iii) Nursing diagnosis
- (iv) Tourniquet
- (v) Hemiplegia
- (vi) Loss of fluid from the body
- (vii) Anorexia
- (viii) Bluish discolouration of skin
- (ix) Low immunity
- (x) Sub-cutaneous

Column 'B'

- (a) Anal surgery
- (b) Cyanosis
- (c) Paralysis of one side of the body
- (d) Dehydration
- (e) If necessary in emergency
- (f) 45 degree angle
- (g) Problem, Etiology
- (h) Prone to infection
- (i) Check haemorrhage
- (j) 90 degree angle
- (k) Loss of appetite

ROLL No. _____

5. Match The Following From Column 'A' To Column 'B' 1x5=5

COLUMN A

- a) Respiratory centre
- b) Sugar in urine
- c) Haematemesis
- d) Loss of fluid from the body
- e) Inflammation of joints

COLUMN B

- i) Infection
- ii) Arthritis
- iii) Dehydration
- iv) Glycosuria
- v) Blood vomiting
- vi) Medulla oblongata

6. Write 'True' or 'False' against the following statement :- 1x5=5

- a) Act of swallowing is known as mastication. ()
- b) Autoclaving is the best method of sterilization. ()
- c) Back rest is used to relieve pain. ()
- d) Symptoms are experienced by patient. ()
- e) Lack of body fluid leads of dehydration. ()

7. Fill up the blanks with suitable word : 1x5=5

- a) Enema is given in _____ position.
- b) Florence Nightingale was born in the year of _____
- c) The method of separation of an infected person is called _____
- d) Difficulty in micturition is known as _____
- e) Lack of oxygen in the tissues is called _____

8. Encircle (O) the most suitable answers : 1x5=5

- a) inflammation of the tongue is called
 - i) Gingivitis
 - ii) Parotitis
 - iii) Glossitis
- b) During intradermal injection the needle is inserted at-
 - i) 90°
 - ii) 15°
 - iii) 45°
- c) Care of dying patient includes the following except -
 - i) Mouth Care
 - ii) Active range of motion exercise
 - iii) Position change
- d) World AIDS day is celebrate on -
 - i) 7th April
 - ii) 5th June
 - iii) 1st December
- e) Freedom from infection -
 - i) Asepsis
 - ii) Sepsis
 - iii) Antisepsis

- e) Antipyretics reduces the temperature. ()

8. Encircle the most appropriate answer :

1x5=5

- a) Act of swallowing is termed as -
 - i) Mastication ii) Micturation iii) Deglutition iv) Defaecation
- b) Anti rabies vaccine was discovered by -
 - i) Louis Pasteur ii) Robert Koch iii) Edward Jenner iv) Alexander Fleming
- c) To give Intramuscular injection the needle is inserted at -
 - i) 45° angle ii) 90° angle iii) 60° angle iv) 75° angle
- d) Inflammation of the tongue is termed as :
 - i) Tooth decay ii) Parotitis iii) Gingivitis iv) Glossitis
- e) Bradycardia means pulse rate -
 - i) 100 beats / min ii) Below 50 beats / min iii) 80 beats / min iv) 72 beats / min.

WEST BENGAL NURSING COUNCIL**PRELIMINARY GENERAL NURSING-MIDWIFERY (3½ years) EXAMINATION, JUNE - 2012****SUBJECT : FUNDAMENTALS OF NURSING (PAPER III) (OBJECTIVE)****Full Marks: 20****Time Allotted: 20 mnts.****ANSWER ON THIS SHEET ONLY****5. Fill in the blanks with appropriate answer :-****5x1=5**

- a) Sudden decline of temperature is termed as _____
- b) Voiding small amount of urine is known as _____
- c) Dusting can be done best by _____ dusting.
- d) Nurses' Day celebrated on _____
- e) When the patient is lying on bed on his back is called _____ position.

6. Encircle the best Answer :**5x1=5**

a) In which type of physical examination a stethoscope is used -

- i) Percussion
- ii) Auscultation
- iii) Palpation
- iv) Inspection

b) Inflammation of the tongue is formed as -

- i) Tooth decay
- ii) Parotitis
- iii) Gingivitis
- iv) Glossitis

c) Drugs used for relief of pain are -

- i) Analgesics
- ii) Antibiotics
- iii) Sedatives
- iv) Narcotics

d) Purpose of applying tourniquet is -

- i) To unite the broken bones
- ii) To check haemorrhage
- iii) To improve circulation
- iv) To relieve pain

(2)

e) Vital signs includes the assessment of -

i) Temperature and pulse

ii) Temperature, pulse, respiration & Blood Pressure

iii) Temperature and respiration

iv) TPR, B.P. and Pain

7. Write 'T' against 'True' and 'F' against 'False' statement :

1x5=5

a) Haemorrhage which occurs at the time of injury is called primary haemorrhage. ()

b) Rest and sleep increases pulse rate. ()

c) Autoclaving is the best method of sterilization. ()

d) Absence of breathing for a short time is termed as grunting. ()

e) Bradycardia means rapid pulse. ()

8. Match Column 'A' with that of Column 'B'

1x5=5

Column A

Column B

a) Loss of appetite

i) Blood vomiting

b) Haematemesis

ii) Insomnia

c) Strong Alkali poisoning

iii) Dehydration

d) Inability to sleep

iv) Blood in urine

e) Loss of body fluid

v) Orange or lemon juice

vi) Anorexia

Roll No. _____

WEST BENGAL NURSING COUNCIL

Preliminary General Nursing Midwifery (3½ years) Examination - June 2011
Sub : FUNDAMENTALS OF NURSING (PAPER - III) (OBJECTIVE)

Full Marks : 15

Time Allotted : 15 Mins.

Answer on this sheet only

Q5. Fill in the blanks :-

1x5=5

- a) Splint in fracture is used for _____
- b) Florence Nightangle was born in the year _____
- c) One litre is equal to _____
- d) Pulse rate above 120 beats/min is known as _____
- e) Antirabis vaccine is discovered by _____

Q6. Write 'T' for correct statement & 'F' for incorrect statement :—

5x1= 5

- a) Bradycardia means slow pulse ()
- b) The special instrument for examination of eye is known as Proctoscope ()
- c) Voiding of urine with blood is known as hematuria. ()
- d) Condyloma is prepared from hydrogen peroxide ()
- e) The green leafy vegetables are Protective food ()

Q7. Match the Column 'A' with Column 'B' :—

1x5= 5

- | <u>Column - 'A'</u> | <u>Column - 'B'</u> |
|---------------------|-------------------------------|
| a) QDS | i) Inflammation of gums |
| b) Anorexia | ii) Prone to infection |
| c) Low immunity | iii) Benedict solution |
| d) Gingivitis | iv) Albumin in urine |
| e) Sugar in urine | v) Four times a day |
| | vi) Difficulty in respiration |
| | vii) Loss of appetite |

5. Fill in the blanks :

(5 X 1 = 5)

- a. Respiratory center is situated in the _____
- b. Passing of black tarry stool is termed as _____
- c. Break in the continuity of the bone is known as _____
- d. Florence Nightingale was born in the year _____
- e. Distension of abdomen with gas is called _____

6. Encircle the best answer :

(5 X 1 = 5)

- a. All are effects of application of local heat EXCEPT :
 - i) Pain relief ii) Muscle relaxation iii) Healing iv) Decreased blood flow.
- b. Anti rabies vaccine was discovered by :
 - i) Louis Pasteur ii) Robert Koch iii) Edward Jenner iv) Alexander Fleming.
- c. Oral temperature is taken when the patient:
 - i) Is unconscious ii) Is confused iii) Has a nasogastric tube
 - iv) Below 5 years of age
- d. Act of swallowing is termed as :
 - i) Mastication ii) Micturition iii) Deglutition iv) Defaecation
- e. Care of the dying patient includes the following EXCEPT :
 - i) Eye care ii) Mouth care iii) Active range of motion exercise iv) Position change

7. Match the column "A" with column "B".

(5 X 1 = 5)

Column - A

- 1. Sitz Bath
- 2. Low Immunity
- 3. Oxygen
- 4. Constipation
- 5. One pint.

Column - B

- a) Dyspnoea.
- b) High roughage diet.
- c) 500 ml.
- d) Anal surgery.
- e) Prone to infection.
- f) Objective sign.

1x10=10

COLUMN - A

COLUMN - B

- | | |
|-----------------------|---|
| 1. Intermittent fever | a) Twice a day |
| 2. Stat | b) 140 beats / min. |
| 3. Injection | c) Gun shot injury |
| 4. Helitosis | d) Malaria |
| 5. World Health Day | e) Parenteral route of administration of Medicine |
| 6. Lacerated injury | f) Heat regulating Centre |
| 7. Stupor | g) Stage of unconsciousness |
| 8. Acidosis | h) 7th April |
| 9. Hypothalamus | i) Offensive breath |
| 10. Tachycardia | j) 50 beats / min. |
| | k) At once |
| | l) Blood P_h lower than normal |

6. Fill in the blanks :-

1x5=5

- A patient who complains of insomnia is usually given _____ group of drugs.
- Black Stool due to presence of blood is known as _____
- An individual who spreads infection without suffering himself is called _____
- When patient lying in bed on his abdomen, that position is _____ position.
- The steps of nursing process are assessment, planning care, _____, evaluation.

7. Write "T" against the True and "F" against the False Statement :-

1x5=5

- The special instrument for examination of eye is known as proctoscope.
- Lack of body fluid leads to dehydration.
- Burning or difficulty in micturation is termed as dysuria
- Application of heat hastens the physical and chemical process of suppuration.
- While cold sponging, the temperature reduced by the process of radiation.

Full Marks : 20

Time Allowed : 20 mnts.

Answer On This Sheet Only

6. Match the Column - A with Column - B of the following :

10

COLUMN - 'A'

1. Sudden decline of temperature
2. Orthopnea
3. S. O. S.
4. Compound fracture
5. C. M.
6. Antirabies Vaccine
7. Stridor
8. Pyuria
9. One Liter
10. Sitzbath

COLUMN - 'B'

- a. If necessary
- b. Whistling sound with each forced inspiration
- c. Difficult respiration in supine position
- d. Louis Pasteur
- e. Crisis
- f. Pus in Urine
- g. Fractured bone protruding
- h. Tomorrow morning
- i. 1000 c.c.
- j. Congestion of pelvic organs
- k. 500 c. c.
- l. Each morning

7. Fill in the blanks :

1 x 5 = 5

1. Florence Nightangle was born in the year _____
2. Distension of abdomen with gas is called _____
3. Pulse rate above 120 is known as _____
4. Drugs used to reduce pain is known as _____
5. When patient is lying on bed on his abdomen his position is called _____ position

8. Encircle the best answer :

1 x 5 = 5

1. All are effects of application of local heat except -
 (a) Pain relief (b) Muscle relaxation (c) Healing (d) Decreased blood flow
2. Antirabies Vaccine was discovered by -
 (a) Louis Pasteur (b) Robert Koch (c) Edward Jenner (d) Alexander Fleming
3. Rectal temperature should not be taken when the patient -
 (a) Is unconscious (b) Is confused (c) Has a nasogastric tube (d) Had rectal surgery
4. Act of swallowing is termed as -
 (a) Mastication (b) Micturition (c) Deglutition (d) Defaecation
5. Care of dying patient includes the following except -
 (a) Eye care (b) Mouth care (c) Active Range of motion exercise (d) Position change
